DT42 IP Alarm Receivers

Get alarms over IP either directly from panels or from connected servers. No matter if the alarm panels is connected through ethernet or gprs, DT42 gets it.

Multiple sources and outputs

DT42 works directly from various alarm panels or with several manufacturers services and servers.

Several legacy alarm receivers can also connect to DT42 serial port.

Outputs to automation software such as SECURITHOR in standard format via serial, usb or IP. Multiple destinations possible.

DT42 RECEIVERS
HOW IT WORKS

DT42 | IP RECEIVER

GPRS 3G/4G

CLOUD SERVICES

PANELS OVER ETHERNET

DT42M IP AND PSTN RECEIVER

DT42M 1P+1PSTN CONTACT ID SIA

APP GUARD

MONITORING SOFTWARE

Alarms Over IP or phone

DT42m hybrid receiver not only handles alarm over IP. It's also equipped with one phone line to handle legacy alarm panels reporting in Contact ID and SIA.

IP and PSTN are both reported to Monitoring software or to the app when using DT42gbm for guard booths.

Like a PC, without a PC

DT42 is a stand alone single board computer running Linux.
A safer approach because DT42 takes care of a single task without the security risk of windows os.

DT42 effectively shields your monitoring PC from DDoS attacks. The receiver does not have to share resources or worry about issues from Windows OS. Polling of alarm panels set per channel means your monitoring software does not have to handle all the load from panels.

Install on desktop or rack-mount for more convenience

DT42 IP Alarm Receivers

Receiving more than any other receiver

No other receiver does more formats nor tested as many brands insuring you can use mix of alarm panels without conflicts

Verify connection details with MCDI as they can vary by model within the same brand.

Alarm codes you can read

DT42 has a 4000 accounts database showing account infos name, address, phone of the person to contact.

Alarm codes are spelled out in plain language according to the Contact ID and SIA standards: Fire, Burglary... All can be viewed on web pages from the DT42.
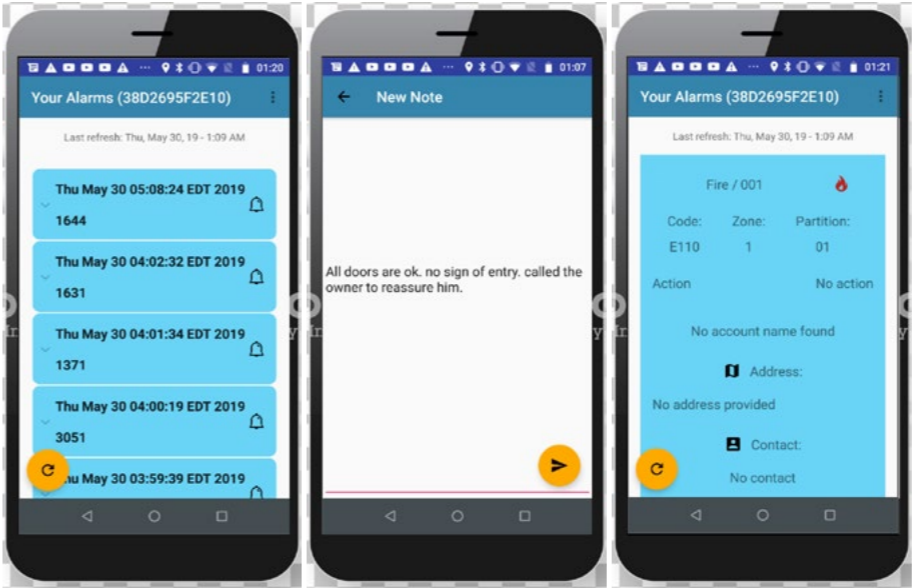

With DT42gb, guards and patrols can read action list and write intervention notes in Android app.

View alarms without Monitoring software

DT42gb sends alarm signals notification to DT42 Android app.
Guards, Patrols and staff are notified of a new signal. They see account and alarm code details. They can write intervention notes.

DT42gb provides basic monitoring capacity to guards booths and gated communities without need of a Monitoring Software.

ALARM RECEIVERS
For Phone lines

MCDI Alarm Receivers are the workhorse of Central Stations since 1994

Exprecium D and Decrypta 4 are the 10th generation of MCDI alarm receivers for phone lines.

EXPRECIUM D™ makes alarm monitoring easy for Industries, Building, Health Services, College Campuses and Security departments.

Many redundancy features such as dual lines, dual power sources, dual output make them the go to alarm receivers around the world, no matter if your are an Alarm Receiving Centre or a corporation that wants to self monitor. Easy to set-up, easy to use no matter if in a Guard booth or in a Control room.

Ed gives you the largest choice of alarm formats at affordable price. With two phone lines per board, Exprecium gives you the power to turn your PC into a powerful alarm receiver.

Starting with one board, you can add boards as your Monitoring Station grows. ARC of all sizes are trusting MCDI receivers for 25 years.
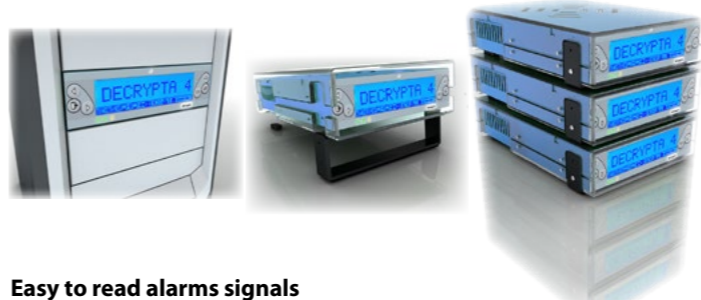

Exprecium does not impose a logical limit to the number of customers per line and comes with a 4095 events memory, Caller ID, independent lines, handshake tuning for faster receiving and multi-languages configuration tool.

Outputs
Exprecium D reports signal to PC in MCDI, MCDI Enhanced, Surgard MRL2/MLR2000 and Ademco 685 modes.

Beyond the black box
Unique features designs that bring

Easy to read alarms signals
Just read the incoming alarm from the front display and browse up and down incoming alarm events by order of arrival. Caller ID is also displayed when available. An external 5V relay at the back can trigger lights, sirens.

Dual Power Sources, Dual Inputs, Dual Outputs
D4 can be powered by AC-DC power supply or external battery thus making sure your receiver keeps on receiving for days even in case of power outage.

Dual Inputs
2 RJ11 phone line jacks. Alarms are received simultaneously on both phone lines. Lines are identified with a line number (0 to 255) so many D4 can be used with Monitoring Software.

Dual Outputs
Connection to computer: 1 USB port and 1 serial port with selection of Primary and Secondary.

Event Logging when PC is absent:
EXPRECIUM stores last 4095 events at all time and receives alarms even when PC is down.

Monitoring Software:
Exprecium is compatible with most automation softwares on the market including **SECURITHOR v2**, SECURITHOR v1, SAMM X, WINSAMM, ABM, A-traq, Bykom, Centralworks, FROUROS II, Patriot, SIS, SIMS, and Softgard.

Multi-language display, configurator and traffic viewer
Comprehensive PC configuration tool in English with translations in Arabic, Deutsch, Español, Farsi, Portuguese and Russian. Traffic viewer for PC and log file included. Traffic viewer allows sending main output to automation software while secondary output transmits to viewer for log writing.

SPECIFICATIONS

DT42/DT42m

Alarm receivers
DT42   receiver, alarms over IP
DT42m   receiver, alarms over IP and phone lines

Power supply: 100-240V AC input 50-60Hz, output 5Vdc 2.4A
Consumption:
DT42/DT42gb: typical less than 1.1A 5VDC
DT42m/DT42gbm: typical less than 1.2A 5VDC

Communication:
DT42gb: ethernet, usb, serial
DT42m/gbm: ethernet, usb, serial, analog phone

Dimensions:
5.720" L x 5.750" W x 1.635":H (excluding connectors and rubber feet)
Rack-mount width 19 inches, height: 1U, 6.5 in deep
Finish: bright orange enamel, black serigraphy.

Android app: 5.1+ with notifications enabled. Access to Google Notifications

Verify connection details with MCDI as they can vary by model within the same brand.
Verify connection details with MCDI as they can vary by model within the same brand. Ports opening and forward to DT42 according to alarm formats and usage. Number of sites supported varies according to reporting frequency and encryption level.

Memory 12,000,000 events stored in DT42. Equipped with a removable micros SD card for logging. Logs can be downloaded to PC over ethernet.

Languages Configuration interface in French, English and Spanish.

Warranty period
DT42 is backed by MCDI SP 2 years limited warranty. Programming updates are free during the warranty period.

DT42 is reporting in standardized formats to most Automation Software on the market including SECURITHOR V2, SECURITHOR V1, WinSAMM, SAMM, A-traq, Bold Gemini, Bold Manitou, Centralworks, MAS, Microkey, Patriot, SIS, SIMS. Direct IP connection to third party software available with supplied component.

DT42 specifications are for version 2 and for units shipped as of May 2019

MCB Mission Control Board
As a plug-in for Securithor or stand alone module MCB Go!

MCB Mission Control Board
Workforce Track and Dispatch.
Configurations:
MCB as a plug-in for Securithor: 10,25,50,100 users
MCB Go! Stand alone application: 25,50,100 users

Technical requirements
MCB Android app 7+ . 80MB space. GPS capacity and Internet connection for communication to station.
Bandwidth according to size of information transferred.

Station requirements (PCB application, staff of 10, no other application sharing PC with PCB to the exception of SECURITHOR FOR MCB plug-in):
Minimum for trial: i3, 4GB ram, 10GB HDD for installation.
Hostname or static IP. One port dedicated and forwarded to PCB PC
Bandwidth according to size of information transferred.

Contact MCDI for production requirements as they vary according to usage and number of connected staff.
Compatible outgoing mail server and ftp space for checkpoint notifications.

NFC tag use requires compatible phone with NFC reader and compatible NFC tags.
QR code scan requires compatible phone with camera and Android QR code resources.

MCB app uses phone's gps-a system for geolocation and geofencing. Must be enabled at all time.

Internet connectivity and link to MCB Server must be insured at all time for optimal use. Some feature might not work without internet connectivity.

Phone's camera use requires accepting relevant permissions.
Some feature may not apply to all phones or tablets.

SECURITHOR MONITORING SOFTWARE

Configurations
Single PC:
STL Starter kit
ST1 SECURITHOR V2 one station, unlimited accounts

NETWORK EDITION:
STS Server license
STWx Workstation license according to number selected.

SECURITHOR Add-on Modules (options)

APS Assistance app for iPhone and Android.
Compatible with Android 5+ and iOS 10+
Individual phones not supported.

Bluetooth button offered as recreational or convenience purposes.

Range and connection according to Bluetooth environmental capacity at site of use and characteristics of phone and battery capacity.
Geocoding and Mapping in Rendez-Vous system requires maintaining a Securithor support plan.

CAM/CAM Premium
STL: option
ST1: CAM included, CAM Premium as option
STS: CAM included, CAM Premium as option

CAM module
SDK Integration:
Hikvision, Dahua, EPCOM
CAM Listener for direct Hikvision and Dahua device alarms.
Automatic opening of provisioned video feed with pre-alarm
Video feed recording.
Audit trail for activation without prior alarm signal.
Screenshot on demand for MCDI Viewer.
Control of zoom, iris, focus, ptz, 2 way audio, relays (when applicable)
External jump http link, rtp, rtsp, jump to external windows app
Pre-alarm per device for SDK integrations.

CAM Premium
All in CAM module plus the following:
.Reference images tool in selected MCDI Viewers.
.SDK Integration: Cubitech Tribrid, Dahua, Elmo, Focus H&S, Hikvision,

---

IDIS, TVT, Vivotek.
.CAM Listener: alarms from selected Dahua and Hikvision Cameras and DVR.
For SDK integrations:
Video feed recording
Pre-alarm opening (setting per device)
Screenshot capture on demand.

.External jump http link, rtp, rtsp, jump to external windows app
.Interface communication: Bosch CBS, DAVANTIS Daview, Frontel (Videofied), Visonic Visnap (with MCDI VOD) and Visonic Power Manage.

As courtesy, without technical support:
.Bridge to P2P Hikvision**, ONVIF**

Update of third part cameras, devices DVRs via Securithor update.
Contact MCDI to get the camera matrix list

Video (optional modules, third part software not included)
.Bridge to ACC Avigilon 4/5/6. Alarm receiving from ACC, Bridge to ACC.
.Interface to Davantis DAVIEW
.Bridge to Frontel from Videofied

Weboperator
Web Access for staff, alarm system installer.
Server + number of channels (# of concurrent access)
Server installed by MCDI in Windows environment.

As services by MCDI:
Push Notification Service
Web Access Module for Subscribers
Hosting by MCDI, pricing according to number of accounts in Securithor
Requires port opening and forwarding to SECURITHOR.
Push notification app
Android app: 5+
iPhone: iOS 10+

Direct MCDI products for SECURITHOR
.API: Rest api for SECURITHOR
.Customized installation (db on Linux Server)
.Push Notification Service
.Web Access Module

.App personalization
.Dedicated support plans.

SECURITHOR Minimum Requirements
To operate trial:
Intel process i3, 4GB Memory, 40GB space on disk

To operate for production:
Contact MCDI as minimum requirement vary according to usage and traffic.

OS: Securithor user interface can operate under Genuine Windows 7, 8, 10, .net framework 4.6.2. required.

Servers license: compatible with Genuine Windows 7, 8,10, 2012, 2016 Pro version recommended with latest update. .net framework 4.6.2 required.

Email and SMS
SMS notification works with third part compatible modem not supplied with Securithor: Sony Ericsson GM28/29 GT47/48, Janus, Telit 864 family, Siemens/Cinterion mc52i, mc65. Number of modem and gateway capacity must be sufficient to handle traffic generated by Securihtor.

Email notification requires a third part compatible outgoing mail server not supplied with Securithor. TLS 1.1 and 1.2 required. Server capacity per second/minute/hour/day must be sufficient for traffic generated. No write/read receipt management.

MVP MAP VIEWS AND PLANS
Plug-in Module for SECURITHOR

Minimum requirements:
For display of maps: recent quad i7 with fast video card.
8GB Memory dedicated to video
Access to video camera equal to Securithor license.

MVP is not intended to process large volume of alarm signals. Securithor should be preferred for this task. Map views require maintaining a Securithor support plan.

Push Notification Service by MCDI
Connects SECURITHOR to Push Notification system by Apple, Google.
Yearly service by MCDI. Hosting in Canada.
Requires stable and continuous internet connection to MCDI server. Bandwidth according to traffic.
Alarm Station app available for Android and iOS (iPhone and iPad).
Provisioning via STnet provides individual subscribers registrations.

EXPRECIUM D phone line receiver
Communications (Ed and D4)
2 RJ11 type jacks for connection of phone line

Type: Pulse, DTMF, FSK
Reception Speed: 10, 20, 40 pps DR / CS
Handshake and Kiss-off: 1400Hz /2300Hz/2225Hz
Pulse Frequency: 1800Hz / 1900Hz
Telim//Robofon: 1180Hz / /1100Hz

Reception Formats supported (Ed and D4):

Acron	Radionics 6500
Ademco:	Radionics extended
- Slow/Fast;	Sescoa Slow, Super Fast
- Contact ID;	Sescoa Standard
- Extended;	SIA
- Express;	Silent Knight Slow
- High Speed	Stratel
FBI Super Fast	Napco Point ID
3x1	BFSK,CFSK, VFSK)
4x1	3x1 extended
4x1 extended	3x1 extended compressed 4x2
4x2	4x1 extended compressed 4x2
MC42	Zero removed 3x1, 4x1, extended.
Optex's Varitech	C&K; Bell 103A2

All boards are delivered with Bell 103 on both lines.

Reporting protocols to Automation Software
Output as MCDI, SG MLR2 or Ademco 685. Some formats are not available to all reporting protocols.

Printer Output:
Exprecium D supports Epson T Family POS printer through Serial communication. Designed for Epson T88V USB and Epson LX 300 families. Converters not supported.

Power Requirements:
From computer +12V Supply: 225 mA typ.
From 12V Battery (standby):   225 mA typ.

Station Requirements:
PC chassis with 12V electrical supply though PCI or PCI-E bus with full length PCI or external 12Vdc power supply
Signal: USB 1.1/2.0/3.0 or Serial port.
Configuration tool : PC running OS allowing installation of .NET 3.5 such as Windows XP, 2003, Vista, Server 2008r2, 2012, Windows 7, 8. 8.1 and 10.

DECRYPTA 4 phone line receiver
Power Requirements:
Auto reboot upon power restore. From 9-12V DC Battery/ Power Supply: 250mA with fall-over management. Included power supply: 96-240V auto-ranging. IEC13 power cord to wall outlet.
Energy saving automatically switches LCD backlight when switching to battery.

Relay
D4 is fitted with an internal relay to trigger externally powered devices such as a visual indicator, strobe light or siren. Terminal posts, dry contacts, on D4 back for normally open and normally close positions. Relays triggered each time an alarm signal is received by D4. Relay maximum current 30VDC 1A max.

Station Requirements
D4 can be configured and operated without PC by menus on front display in English, French, German, Italian, Portuguese, Russian and Spanish.

Configuration by PC through USB or serial port. PC configuration tools requires installation of Microsoft .NET 3.5 framework on D4 CD.
PC configuration tool in Arabic, English, Farsi, French, Italian, Portuguese, Russian and Spanish. POS printer of compatible with Epson T family . Designed to use with Epson T88V.

Relay Relay triggered each time an alarm signal is received by D4, Relay maximum current 30VDC 1A max. NO or NC available.

Caller ID service must be provided by Telco (Bellcore type 1 or compatible ETSI types) for Calling phone number to display.

Reporting protocols to Automation Software
Output as MCDI, SG MLR2 or Ademco 685. Some formats are not available to all reporting protocols.

DRIVERS AND COMMUNICATION
USB drivers supplied 7, 8, 8.1, 10, Server 2012. Serial communication with DOS, Linux, and Windows. D4 can be configured and operated without PC or with PC using OS with .net 3.5 enabled.
Warranty period: 2 years limited warranty for Ed and D4.
MCDI SP 2 years limited warranty. Programming updates are free during the warranty period. Power surges from phone lines are specifically excluded. Wired pstn phone line required on both signal sending and receiving ends. Requires signal integrity at receiving end. Individual signal quality troubleshooting not performed nor provided by MCDI.
